

ARROW RECOVERY GROUP
Fontana, California

CLIENT: Xebec Building Company

DESCRIPTION: This two building complex totaling approximately 74,000 square feet posed unique challenges to overcome. The site required GAA to come up with innovative solutions in order to accommodate all the requirements for trucking, parking, and equipment, and the high-hazard nature of the facility required a high degree of knowledge and skill to create an efficient and viable design.

This facility provides administrative offices as well as e-waste recycling and gold refining plant which required H2, H3, H4, F1, S, and B occupancies.
